

ABOUT THE iMENTOR COLLEGE PROGRAM

College is different from high school. Successfully transitioning from high school into college, especially for first generation college students, can be complex and challenging. We understand this difference. We believe that effective support is as much about the quality of the resources and services as it is about the trust in the people delivering them.

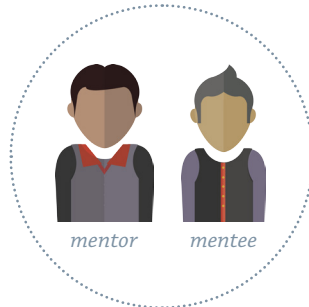

THE APPROACH

The *iMentor College Program* combines the individual support of a mentor, the expertise of staff, and high quality resources and events to create an ecosystem of support for each student.

The Program Model

iMentor provides resources and opportunities to guide mentees through college. Mentors and mentees work together to navigate these resources and identify challenges along the way.

College Success Counselors advise pairs on topics that require their expertise.

Community events allow participants to learn and collaborate with peers.

Our platform delivers customized resources when pairs need them.

Mentor Responsibilities

Mentors in the college program direct mentees to the right resources at the right times. Here's how:

Talk to your mentee regularly

Connect your mentee to resources

Respond to text reminders
